Customer Survey

What is your favourite LEGO theme?

Choose LEGO Theme:

What would be your budget for a LEGO set?

☐ Low (Under \$50)
☐ Medium (\$50 - \$100)
☐ High (Over \$100)

Please select your age

☐ Under 18
☐ 18-30
☐ 31-50
☐ Over 50

Please select a rough date and time for when you last purchased LEGO:

dd/mm/yyyy --:--:--

In the 1980s, Lego faced financial difficulties due to increased competition from other toy companies and a decline in sales. However, the company rebounded in the 1990s with the introduction of new themes such as Lego Technic and Lego Mindstorms. In the 2000s, Lego continued to expand its product line and introduced new themes such as Lego Star Wars and Lego Harry Potter. The company also began producing video games and movies based on its popular themes. Today, Lego is one of the most popular toy brands in the world, with a wide range of products and a strong presence in the entertainment industry.

Below is my CSS code in an external file

A screenshot of the Visual Studio Code editor interface. The Explorer sidebar on the left shows a file named '# styles.css' selected. The main editor area displays the content of this file. The code is CSS, with line numbers 1 through 42 on the left. It includes several class selectors: '.ad-text' with max-width, font-size, and line-height; '.newsletter-signup' with text-align; '.legoland-container' with display, align-items, and justify-content; '.legoland' with width; '.customer-survey' with text-align; and '.darth-revan-photo' with position, margin-left, and margin-top. There are also comments about inheritance and a note about the location of pictures. The code is as follows:

```
1  .ad-text {
2      max-width: 300px;
3      font-size: 18px;
4      line-height: 1.5;
5  }
6
7  .newsletter-signup {
8      text-align: center;
9  }
10
11  .legoland-container {
12      display: flex;
13      align-items: center;
14      justify-content: center;
15  }
16
17  .legoland {
18      width: 500px;
19  }
20
21  .customer-survey {
22      text-align: center;
23  }
24
25  /* 7) Inheritance of <p> and location Cascade Principle */
26  /* p1 is read first but since p2 is read last it wins */
27  p {
28      color: red;
29      font-size: 440px;
30  }
31
32  p {
33      color: blue;
34      font-size: 20px;
35  }
36
37  /* 8) positioning stuff */
38  .darth-revan-photo {
39      position: absolute;
40      margin-left: 2200px;
41      margin-top: 60px;
42  }
```

Note: The location of the pictures may differ depending on what screen size you view it on, for example, i created my html page based off my computer screen size of 2560x1440, but on my laptop the pictures appear off screen, therefore with this submission, i have changed it to fit on my laptop so i can demonstrate it to the lab demonstrator.
